Hot Rods, the "Original Cranks and Rods," has been making the best aftermarket crankshafts and connecting rods for over a decade. Customers have come to recognize that there is no substitute for the quality of Hot Rods products. Moreover, all Hot Rods cranks and rods can be had for considerably less money than OEM, but without any sacrifice to quality. And, for those dirt bike and ATV riders seeking added performance from their mount, Hot Rods offers a full line of stroker crankshafts. These cranks will not only

provide the power that riders seek, but do so without additional machine work or spacer plates — and most utilize the stock piston.

Hot Rods, the "Original Cranks and Rods," da oltre dieci anni realizza i migliori alberi motore e le migliori bielle per il mercato aftermarket. I clienti hanno riconosciuto che la qualità dei prodotti Hot Rods non ha eguali sul mercato. Inoltre, tutti gli alberi motore e tutte le bielle Hot Rods sono disponibili a un prezzo infinitamente inferiore rispetto ai ricambi OEM, senza alcun compromesso a livello di qualità. E per i piloti che alla guida di moto da cross, Quad ed ATV, ricercano nuove soluzioni per incrementare le prestazioni dei loro mezzi, Hot Rods offre una gamma completa di alberi motore stroker. Tali alberi motore oltre a fornire l'incremento di potenza richiesto dai piloti, non richiedono applicazioni extra o l'impiego di piastre distanziali e consentono nella maggior parte dei casi l'impiego di pistoni standard.

Hot Rods Connecting Rods

One single connecting rod is where it all began for Hot Rods and, now, with over a decade of experience, continuously improved designs and an ever expanding line of applications; Hot Rods has continued to be, not only "The Original" aftermarket replacement rod, but the best aftermarket replacement rod.

All of our rods are created from 8620 case hardened steel. But, in addition to that, our rods also undergo a process of double forging which helps to improve grain flow as well as dimensional consistency — and that means a rod of uncompromising strength.

To improve fatigue durability, all of our rods are also shot peened. This process, utilizing a stainless steel shot, helps to remove stress risers and creates more smoothly blended radiuses. And, in the end, a Hot Rods connecting rod is one of the most durable rods that enthusiasts and engine builders can buy.

However, a rod is only as good as its supporting parts and that's why a Hot Rods kit features only the most advanced and durable bearings, crank pins and thrust washers. Case hardened, silver coated, flat profile KU bearings are used throughout our entire line and high-quality, long shouldered KZ bearings are used in our two-stroke wrist pin bearing applications. In short, our bearings are just as tough and reliable as our rods.

Even our crank pins are subjected to the same rigorous standards as our rods and bearings. Each Hot Rods crank pin is created from hot-rolled ASTM 4115 steel and case-hardened to a level of 58–62 Rc.

Bielle Hot Rods

La storia di Hot Rods ha avuto inizio da una sola biella, e ora, con oltre dieci anni di esperienza alle spalle, continua con miglioramenti a livello di design e progettazione e con una gamma di applicazioni in continua espansione. Hot Rods oltre a essere diventato per eccellenza il marchio di bielle di ricambio "Originali" per il mercato aftermarket, è anche ritenuto a ragione il marchio numero uno per qualità.

Tutte le nostre bielle sono create a partire da acciaio cementato 8620. Le nostre bielle inoltre sono sottoposte a un processo di doppia forgiatura che aiuta a migliorare il fibraggio (grain flow) nonché l'uniformità dimensionale, ottenendo una biella dalla resistenza senza compromessi.

Per migliorare la resistenza alla fatica, tutte le nostre bielle vengono anche sottoposte a pallinatura controllata. Tale processo, che utilizza pallini in acciaio inossidabile, aiuta ad eliminare i punti deboli in cui si concentra il carico, creando raggi con mescola più uniforme. Una biella Hot Rods è praticamente una delle bielle più resistenti che gli appassionati di elaborazioni e i costruttori di motori possano acquistare sul mercato.

Ovviamente però una buona biella è tale solo se i suoi componenti di sostegno sono altrettanto buoni, per questo il kit di Hot Rods comprende solo cuscinetti, perni e rondelle di spinta di altissima qualità, tecnologicamente avanzati e altamente resistenti. I cuscinetti KU a profilo piatto, cementati, rivestiti in argento, sono utilizzati in tutta la nostra gamma di prodotti, mentre i cuscinetti KZ di alta qualità, con spalla lunga, sono utilizzati per applicazioni con cuscinetti per spinotto nei motori a due tempi. Tutto questo garantisce che i nostri cuscinetti siano resistenti e affidabili quanto le nostre bielle.

Persino i nostri perni sono sottoposti agli stessi rigorosi standard delle nostre bielle e dei nostri cuscinetti. Ciascun perno di Hot Rods viene creato a partire da acciaio laminato a caldo ASTM 4115 e cementato a un livello di 58–62 Rc.

Additional Hot Rods connecting rod features:

- Double-honed bearing surfaces to provide a reliable, high RPM rod
- Double-drilled small ends for increased lubrication
- Bronze bushings in the small end of all four-stroke rods to maximize durability under high-loads.
- Specially designed vent slots in the large end of all two-stroke rods for improved lubrication
- Side scalloping on large end to minimize high RPM rod distortion

Ulteriori caratteristiche delle bielle Hot Rods:

- Superfici del cuscinetto a doppia levigatura per bielle per elevati giri-minuto ed elevata affidabilità
- Piedi di biella con doppia foratura per migliorare la lubrificazione
- Boccole in bronzo nel piede di biella di tutte le bielle per motori a 4 tempi, per il massimo della resistenza sotto carichi elevati.
- Fenditure di sfiato appositamente progettate nell'estremità più ampia di tutte le bielle per motori a due tempi, per una migliore lubrificazione
- Frastagliatura laterale sull'estremità più ampia, per ridurre al minimo la distorsione della biella per elevati giri al minuto

Hot Rods Crankshafts

Building on the success of high-quality, OEM replacement rods, Hot Rods introduced the perfect place to showcase them — in a Hot Rods OEM replacement crankshaft. Since that time, Hot Rods crankshafts have been regarded as the premier alternative to costly manufacturer cranks. But, in addition to being a cost effective alternative, Hot Rods crankshafts also bring a level of uncompromising quality, design and innovation not seen in its competitors.

One such innovation would be the Hot Rods line of drop-in stroker crankshafts. Not only do these stroker cranks bring about a heightened level of performance, but do so without costly case machining, custom cam chains and spacer plates. Better yet, many Hot Rods stroker cranks even utilize the engine's stock piston.

Alberi motore Hot Rods

Sulla scia del successo delle bielle di ricambio OEM di alta qualità, Hot Rods ha introdotto l'alloggiamento perfetto per ospitarle: un albero motore di ricambio OEM Hot Rods. Da quel momento gli alberi motore Hot Rods sono considerati l'alternativa numero uno ai costosi alberi motore delle case costruttrici. Ma oltre a essere un'alternativa conveniente, gli alberi motore Hot Rods forniscono anche un livello di qualità senza compromessi e un livello di design e innovazione, ineguagliabile dalla concorrenza.

Tra le innovazioni di punta vi è la gamma Hot Rods di alberi motore stroker drop-in. Questi alberi motore stroker oltre a garantire un livello elevato di prestazioni, non comportano extra lavorazioni e non richiedono catene per camme o piastre per distanziali su misura. Un ulteriore vantaggio consiste nel fatto che molti alberi stroker Hot Rods utilizzano persino il pistone standard del motore.

Additional Hot Rods crankshaft features:

- All crankshafts are sold complete and ready for installation with the original proven Hot Rods Connecting Rods, top end bearings, and crankshaft webs
- Factory assembled and trued to OEM specifications, Hot Rods Cranks will meet or surpass the OEM in performance and durability
- Crankshafts are fully rebuildable with genuine Hot Rods connecting rods and bearings
- Multi-cylinder applications are sold complete with main bearings (unless specified otherwise).
- Two and four-stroke applications available

Caratteristiche aggiuntive degli alberi motore Hot Rods:

- Tutti gli alberi motore sono venduti completi e pronti per l'installazione con bielle, gabbia spinotto ed accessori per albero motore originali collaudate Hot Rods.
- Assemblati in azienda e centrati secondo le specifiche OEM, gli alberi motore Hot Rods sono di livello uguale o superiore ai componenti OEM in termini di performance e durata.
- Gli alberi motore sono completamente ricostruibili con bielle e cuscinetti originali Hot Rods
- Le applicazioni multi-cilindro includono i cuscinetti principali (salvo diversamente specificato).
- Applicazioni per 2 e 4 tempi tutte disponibili

Hot Rods Main Bearings and Seals

To compliment Hot Rods full line of OEM replacement and stroker crankshafts are Hot Rods complete main bearing and seal kits. Like other Hot Rods products, these main bearing and seal kits are built to the highest quality standards that meet or exceed those of OEM.

Additionally, not only will Hot Rods main bearing and seal kits work in rebuilding a Hot Rods crankshaft; but, they also work in rebuilding OEM cranks as well.

Hot Cams Builder Series Cams and Gold Series Cams and Springs

The newest additions to the already impressive array of Hot Cams performance camshafts are the Builder Series Cams. The Builder Series Cams, like the standard line of cams, are rooted around ease of installation and genuine, usable performance increases. However, these cams take it a few steps further.

The Builder Series and Gold Series cams are aimed at enthusiasts and engine builders that are looking for the optimum in performance, flexibility and reliability. More importantly, Gold Series cams are designed to compliment modified engines using such things as big bore cylinders, high compression pistons and performance exhausts. Additionally, many applications will see a wide variety of cams to transform and tune your engine to your specific needs. Whether it's endurocross or flat track racing, there's a Gold Series or Builder Series cam to hone the powerband just as it's needed.

Unlike the standard Hot Cams, the Gold Series cams utilize the new line of Gold Series springs. These springs, crafted from premium quality Japanese spring steel, allow for greater flexibility in the cam design and ensure that the valvetrain will remain at its peak performance and trouble-free.

Simply stated, Hot Cams Builder Series and Gold Series cams are modified cams that are specifically tailored to unleash the power within modified engines.

Alberi a camme e molle Hot Cams Gold Series

Gli alberi a camme e i kit di molle Hot Cams Gold Series per elevate prestazioni sono l'ultimo ritrovato di una gamma già impressionante di alberi a camme Hot Cams. Gli alberi a camme della serie Gold Series, come quelli della linea standard, si distinguono per facilità di installazione e per il miglioramento concreto e visibile delle prestazioni.

Ma i vantaggi non si limitano a questo.

I nuovi alberi a camme Gold Series sono la scelta numero uno degli appassionati di elaborazioni e dei costruttori di motori alla ricerca del non plus ultra a livello di prestazioni, flessibilità e affidabilità. Gli alberi a camme della serie Gold Series sono inoltre progettati per la personalizzazione di motori modificati, utilizzando cilindri con diametro maggiorato, pistoni ad elevata compressione e marmitte ad elevate prestazioni. L'ampia scelta di alberi a camme consente di soddisfare qualsiasi esigenza e applicazione, offrendo soluzioni infinite per trasformare ed elaborare il proprio motore. Per qualsiasi tipo di pista, da enduro o cross, o per qualsiasi tracciato c'è sempre un albero a camme Gold Series in grado di fornire la potenza necessaria.

A differenza degli alberi a camme standard Hot Cams, quelli della serie Gold Series utilizzano la nuova gamma di molle Gold Series. Queste molle, realizzate a partire da acciaio per molle giapponese di qualità eccezionale, consentono una maggiore flessibilità a livello di progettazione dell'albero a camme e garantiscono il mantenimento delle massime prestazioni della punteria, senza inconvenienti. Gli alberi a camme Hot Cams Gold Series sono semplicemente alberi a camme modificati studiati su misura per scatenare la potenza dentro ai motori elaborati.

CYLINDER WORKS

Standard • Big Bore

As an alternative to costly OEM cylinders or the time consuming process of re-plating existing cylinders, Cylinder Works offers enthusiasts access to a complete line of OEM quality dirt bike and ATV replacement cylinder kits. In addition to standard bore, stock compression replacement cylinder kits, Cylinder Works also turns up the horsepower with a full line

of high-compression and big bore cylinder kits that look just like stock, but they're not. Each kit comes complete with the piston, rings and gaskets to get back on the trail or track quickly.

Come alternativa all'acquisto dei costosi cilindri OEM o al laborioso procedimento di riparazione dei cilindri originali, Cylinder Works offre agli esperti di elaborazioni l'accesso a una gamma completa di cilindri di ricambio di qualità OEM per moto da cross, Quad ed ATV. Oltre a cilindri di ricambio di diametro standard, Cylinder Works dà spazio alla potenza con una gamma completa di cilindri a diametro maggiorato, che permettono l'incremento della cilindrata e sembrano di serie, ma non lo sono. Le versioni con diametro maggiorato sono disponibili per l'acquisto come singolo cilindro o come kit completo, comprensivo di pistone, segmenti e guarnizioni, il tutto con un pronto servizio per tornare in pista il più velocemente possibile.

Cylinder Works OEM Replacement Cylinder Kits (standard bore/stock compression)

Replating or repairing an OEM cylinder takes time. And replacing an OEM cylinder with another OEM cylinder takes money — plenty of it. But Cylinder Works has a better answer: Get new now, get Cylinder Works!

Gone is the wait associated with replating and repairing, and so is the price tag — all without sacrificing quality.

Each Cylinder Works replacement cylinder kit is:

- Stock in appearance
- Precision honed
- Nickel silicon carbide plated
- OEM quality without the OEM price
- Pistons are hand matched for precision fitment

Cilindri di ricambio OEM Cylinder Works (standard bore/stock compression)

La rettifica o la riparazione di un cilindro OEM è un'operazione laboriosa. E sostituire un cilindro OEM con un altro cilindro OEM costa...e molto! Cylinder Works propone una soluzione migliore: acquistarne subito uno nuovo, di Cylinder Works!

Grazie a Cylinder Works i tempi lunghi delle rettifiche e delle riparazioni sono acqua passata, e i prezzi non sono più un problema. Il tutto a compromessi zero in termini di qualità.

Ogni cilindro di ricambio Cylinder Works è:

- Standard solo all'apparenza
- Levigato di precisione
- Rivestito in nichel carburo di silicio
- Dotato di tutta la qualità e le caratteristiche di un prodotto OEM, tranne il prezzo

Cylinder Works High-Compression Kits (standard bore/high-compression)

As we all know, higher compression equals more horsepower and that's exactly what Cylinder Works high compression cylinder kits provide. Just like our OEM replacement cylinders, our high-compression cylinder kits look like stock, but they're not.

In addition to their stock appearance, Cylinder Works high-compression cylinder kits also feature precision honing, nickel silicon carbide plating and a price that's hard to beat.

Cilindri con diametro maggiorato Cylinder Works (standard bore/high-compression)

Come tutti sanno, più CC equivalgono ad una maggiore potenza, proprio quella che viene fornita dai cilindri con diametro maggiorato Cylinder Works. Come per i nostri cilindri di ricambio OEM, i cilindri con diametro maggiorato sembrano di serie, ma non lo sono.

Oltre ad avere l'aspetto di componenti standard, i cilindri con diametro maggiorato Cylinder Works vantano una

levigatura di precisione, un rivestimento in nichel carburo di silicio e un prezzo imbattibile.

Acquistati singolarmente, i cilindri con diametro maggiorato Cylinder Works offrono agli appassionati di elaborazioni la possibilità di scegliere il pistone e le guarnizioni più adatti.

Cylinder Works Big Bore Kit

With the exception of a mechanic, the Cylinder Works big bore kits provide everything you need to transform a bike or ATV from modest to monster in one box.

In addition to the stock appearing, nickel silicon carbide plated, precision honed, big bore cylinder, each kit contains:

- All needed gaskets and seals to complete the installation
- A Vertex big bore piston, complete with piston rings, wrist pin and circlips.

Kit per cilindri maggiorati Cylinder Works

I kit per cilindri maggiorati Cylinder Works forniscono tutto il necessario, eccetto il meccanico, per trasformare qualsiasi moto, Quad o ATV dalle prestazioni standard in un vero e proprio mostro di potenza.

Oltre al cilindro di diametro maggiorato dall'aspetto di serie, rivestito in nichel carburo di silicio e levigato di precisione, ciascun kit contiene:

- Tutte le guarnizioni e i giunti necessari per completare l'installazione
- Un pistone Vertex di diametro maggiorato, completo di segmenti, spinotto e anellini.

Why we use nickel silicon carbide plating

Nickel silicon carbide plating is used on the cylinder bore of every cylinder, standard and big bore, in the Cylinder Works line up.

The reasons for using nickel silicon carbide, as opposed to cast iron or chrome plating, are simple. Nickel silicon carbide allows for tighter tolerances between the piston and cylinder in larger bores, provides a low friction surface, is extremely durable and allows for greater heat dissipation to the water jacket.

All and all, the end result is a cylinder that not only yields higher performance, but will provide enthusiasts with a durable and reliable upgrade to their bike or ATV.

Perché utilizziamo un rivestimento in nichel carburo di silicio

Il nichel carburo di silicio viene utilizzato nell'intera gamma Cylinder Works per rivestire il diametro del cilindro di ogni cilindro, sia standard sia maggiorato.

Le ragioni per cui utilizziamo un rivestimento in nichel carburo di silicio, anziché ghisa o cromo, sono semplici. Il nichel carburo di silicio consente tolleranze più ristrette tra il pistone e il cilindro in diametri maggiorati, offre una superficie di attrito bassa, è estremamente resistente e consente una maggiore dissipazione del calore nello scambio di calore.

Il risultato che si ottiene è un cilindro che oltre a fornire prestazioni superiori garantisce agli appassionati di elaborazioni garanzie di durata e affidabilità insuperabili per la loro moto, Quad o ATV.

Each Pivot Works kit contains all the necessary components (bearings, seals, pins, spacers, collars, thrust washers and thrust bearings) needed to finish the job without ordering a laundry list of parts. Better yet, all Pivot Works kits meet or exceed the quality of the OEM parts they replace and at a fraction of the cost. And, for those looking for a little assistance in getting their kit installed, Pivot Works posts assembly drawings and installation videos online.

Tutti i kit Pivot Works vantano inoltre una qualità uguale o superiore ai componenti OEM che sostituiscono, ad un costo incredibilmente più conveniente.
