VERTEX
PISTON & POWER

Manufactured in Italy, Vertex, the premier brand of OEM replacement pistons, is the OEM supplier to KTM and numerous European motorcycle and go-kart manufacturers. Vertex offers enthusiasts

state-of-the-art, high-quality pistons for nearly any powersport use from motorcycles and ATVs to marine and karting. Manufactured to the highest standards in Japan, Vertex's piston rings are produced by the OEM suppliers so that they are direct OEM replacements. Vertex is the choice of those who truly seek the optimum in powersport performance in any application.

I pistoni Vertex sono interamente prodotti in Italia e sono primo equipaggiamento di numerose case europee produttrici di moto e go-kart, con in evidenza KTM. Vertex offre agli esperti di elaborazioni, pistoni di alta qualità tecnologicamente ai vertici del settore, utilizzabili per qualsiasi applicazione nei settori: moto (strada e fuoristrada), Quad, ATV, go-kart e fuoribordo, dove il massimo della potenza è un requisito imprescindibile. I segmenti assemblati da Vertex sui propri pistoni, sono fabbricati in Giappone secondo i massimi standard del settore dai fornitori OEM delle maggiori case giapponesi di moto, sono quindi intercambiabili con i prodotti originali. Vertex è la scelta numero uno di chi esige il massimo delle prestazioni nel mondo degli sport motoristici, per qualsiasi applicazione.

Cast vs. Forged What's better and why:

Vertex Two-stroke Pistons

Because of a cast piston's ability to contain higher silicon content compared to forged pistons, and because two-strokes have lower cylinder pressures when compared to four-strokes, cast pistons are ideal for two-stroke engines. Vertex pistons are gravity cast from an aluminum alloy with 18% silicon content. Silicon is important because:

- It decreases thermal expansion, which changes the geometry after the piston reaches operating temperature. With low thermal expansion characteristics, Vertex pistons can be run at tighter tolerances compared with forged pistons. This creates better power and performance, also making them less susceptible to rattling or breaking.
- Silicon gives the pistons better wear characteristics and prolongs piston life by decreasing wear on the piston skirt.

Fuso o forgiato Cosa è meglio e perché:

Pistoni Vertex per motori a 2 tempi

Poiché un pistone realizzato tramite fusione può avere un contenuto maggiore di silicio rispetto al forgiato, e poiché nei motori a 2 tempi le pressioni nei cilindri sono inferiori rispetto alle versioni a 4 tempi, i pistoni fusi sono la soluzione ideale per questa applicazione. I pistoni Vertex 2 tempi, sono realizzati per fusione a gravità da una lega di alluminio con contenuto di silicio pari al 18%. Il contenuto di silicio è importante perché:

- Riduce l'espansione termica che determina il cambiamento della geometria del profilo dopo che il pistone raggiunge la temperatura d'esercizio. Grazie a caratteristiche di espansione termica ridotta, i pistoni Vertex per motori 2 tempi, possono funzionare con tolleranze più ristrette rispetto ai pistoni forgiati. Ciò garantisce un sensibile incremento in termini di potenza e durata, con la sicurezza di un funzionamento più silenzioso e senza eventuali rotture.
- La presenza dell'alto contenuto di silicio permette anche una migliore resistenza all'usura e prolunga quindi la vita del pistone senza cali di prestazioni.

Vertex Four-stroke Pistons

Four-stroke engines have much higher cylinder pressures when compared to two-strokes and are generally manufactured from forgings. To handle the internal pressures of a four-stroke engine, Vertex's four-stroke pistons are forged from the highest quality 2618 aluminum alloy for superior strength and durability. Vertex uses unique piston profiles and compression ratios, offered in A, B, C and D sizes, to maximize power and performance while reducing blow-by and oil consumption.

Pistoni Vertex per motori a 4 tempi

I motori a 4 tempi hanno pressioni nei cilindri molto più elevate rispetto ai 2 tempi e generalmente i pistoni da equipaggiarli, vengono prodotti tramite forgiatura a caldo. I pistoni Vertex per motori 4 tempi vengono forgiati a caldo dalla lega per uso aeronautico 2618, un prodotto di altissima qualità che garantisce doti superiori di resistenza e durata. Vertex applica poi profili esclusivi e conformazioni di testa derivati dallo sviluppo fatto con i teams, il tutto al fine di ottimizzare al massimo potenza, coppia e prestazioni in generale, riducendo al contempo consumo d'olio e trafilamento (blow by).

Aiding in the break-in process and reducing wear, every Vertex piston has a Molybdenum Disulphide (MOS2) coating on the piston skirt.

Per facilitare il rodaggio e ridurre l'usura, ogni pistone Vertex è provvisto di rivestimento in bisolfuro di molibdeno (MOS2) sull'intero corpo del pistone.

Vertex Wrist Pin Features:

- KTM four-stroke wrist pins are DLC coated.
- Case hardened wrist pins are used with all Vertex pistons.
- Nitride coated pins are normally used for high performance four-stroke engines utilizing a bronze bushing or with engines using a steel connecting rod without bearings. This hardened surface is highly wear resistant and provides anti-galling properties.
- Nitriding is a highly specialized surface treatment that produces a highly wear resistant surface. The significant advantage of nitriding is that the surface hardness is developed without quenching and the attendant distortion problems with case hardening. Finishing operations can be eliminated or held to a minimum.

Spinotti Vertex:

- Gli spinotti Vertex, sono normalmente prodotti in acciaio legato con trattamento di cementazione. In aggiunta, esistono le seguenti varianti per i rispettivi campi di applicazione:
- Spinotti nitruati che sono normalmente utilizzati per motori a quattro tempi a elevate prestazioni, che hanno la biella in acciaio con o senza bronza. La superficie nitruata è altamente resistente all'usura e fornisce caratteristiche antigrippaggio.
- Gli spinotti per i pistoni destinati a motori 4 tempi KTM, sono provvisti di rivestimento in DLC.

Vertex Piston Rings

Vertex's latest generation two-stroke and four-stroke piston rings are nitride coated or chrome plated, increasing wear resistance and extending durability. Vertex piston rings are exact OEM replacements.

Segmenti Vertex

I segmenti Vertex di ultimissima generazione per motori a 2 e 4 tempi sono realizzati in acciaio con trattamenti di nitrazione o cromatura. Il tutto per aumentare la resistenza all'usura e per migliorare la durata di vita. I segmenti per pistoni Vertex sono intercambiabili con i corrispettivi prodotti OEM.

All Vertex Pistons Feature:

- Standard pistons and components are OEM replacements.
- Kits include piston, rings, wrist pin and circlips.
- All pistons are heat treated with a T-5 or T-6 hardening and tempering cycle.
- Replacement rings are sold individually.

All Vertex Pistons Feature:

- I pistoni e i componenti standard sono intercambiabili con i rispettivi prodotti OEM.
- I kit comprendono pistone, segmenti, spinotto e anellini.
- Tutti i pistoni sono sottoposti a trattamento termico con ciclo di bonifica T5 o T6.
- I segmenti di ricambio vengono anche venduti singolarmente.

The **GP Racers Choice** has forged treatment and stands out for the T-Bridge exclusive machined, inspired by F1. His racing profile and the special shape of the head allows the maximum compression ratio with a great performance implementation without any loss of reliability. The piston is completed with nitride ring set, DLC coated pin, moly coated.

La **GP Racers Choice**, forgiato ad alta resistenza, spicca per l'esclusiva lavorazione con traversino, una tecnologia derivata dalla Formula 1, che assieme al profilo racing e alla particolare conformazione della testa permette di ottenere il massimo rapporto di compressione a tutto vantaggio delle performance senza sacrifici per l'affidabilità. Il pistone è completato da segmenti nitruati, spinotto con rivestimento DLC e ricopertura in bisolfuro di molibdeno.

PISTON CODES IDENTIFICATION
CODICI DI IDENTIFICAZIONE PISTONI

Code Codice	Description Descrizione
Replica	<i>Cast piston in original OE form</i> Pistone fuso in forma originale
Race	<i>Cast piston developed with Vertex know-how</i> Pistone fuso sviluppato con tecnologia Vertex
Pro	<i>Forged piston</i> Pistone forgiato
Replica BB	<i>Cast piston in original OE form for big bore cylinder</i> Pistone fuso in forma originale per cilindro maggiorato
Pro Replica	<i>Forged piston in original OE form</i> Pistone forgiato in forma originale
Pro BB	<i>Forged piston in original OE form for big bore cylinder</i> Pistone forgiato in forma originale per cilindro maggiorato
Pro Race	<i>Forged piston developed with Vertex know-how</i> Pistone forgiato sviluppato con tecnologia Vertex
Pro HC	<i>Forged piston developed with Vertex know-how and high compression</i> Pistone forgiato sviluppato con tecnologia Vertex ed alta compressione

Easing the repair process by saving time and money Vertex Pistons **Top-End Piston Kits** come with everything needed to replace your piston, top-end gaskets, and wrist pin bearing (for two-strokes) when the time comes. Included are the piston, rings, wrist pin, circlips, top end gaskets, and even wrist pin bearing (for two-stroke applications). **Four-stroke kits include free Camchain!**

Nascono per facilitare la manutenzione del motore facendo risparmiare tempo e denaro, i Vertex Pistons **Top-End Piston Kits** contengono tutto il necessario per la sostituzione del pistone, della guarnizione smeriglio e della gabbia a rulli (per motori 2-T). Sono inclusi: il pistone, gli anelli di fermo, lo spinotto, i segmenti, la guarnizione smeriglio e la gabbia a rulli per le applicazioni 2Tempi. **Il kit per i 4-T contiene la catena di distribuzione in omaggio!**

Includes for 2 stroke engine: complete piston, top end gasket and wrist pin bearing. / Per motori 2 tempi comprende: pistone completo, guarnizioni smeriglio e gabbia a rulli.
Includes for 4 stroke engine: complete piston, top end gasket and cam chain. / Per motori 4 tempi comprende: pistone completo, guarnizioni smeriglio e catena di distribuzione.

with over 60 years of rich heritage means higher performances and attributes which give racers the competitive advantages they are looking for.

This new "street range" in particular has been developed with the experience made supporting Team Gresini Racing for MotoGP, Moto2 and Moto3 World Championships.

Join the Champions' family, fit VERTEX PISTONS on your engine.

con oltre 60 anni di esperienza nel mondo delle corse, è sinonimo delle migliori performances per il vantaggio competitivo che si aspetta il rider.

In particolare questa nuova "gamma strada" è stata sviluppata utilizzando l'esperienza maturata a fianco del Team Gresini racing, nei campionati Mondiali MotoGP, Moto2 e Moto3.

Unisciti alla famiglia dei campioni, monta VERTEX PISTONS nel tuo motore.

2 Stroke

After disassembling the cylinder head and the cylinder, it's necessary to measure the actual cylinder diameter (1), using a dial bore gauge. When actual bore size is known then it is time to pick the right VERTEX piston to fit your bore size, respecting the clearance suggested with the cylinder (i.e. CR 125 clearance 0.05 mm).

Open the piston box, take the ring and position it inside the cylinder bore. Measure the gap (2) between the two ring ends: it must be between a minimum of 0.25 and a maximum of 0.50 mm; if necessary adjust the ring end gap dimension using a file (3). Take special care when performing this step.

We are now ready to assemble the ring into the piston groove: first of all pay attention to not crush or damage the ring during installation, every precaution should be taken not to compromise the ring integrity with the groove and to not reduce the rings retaining pressure.

Attention must be paid to any markings (i.e. T) on the rings surface: always position the ring with the written part on the top side.

Introduce before the ring from the side opposite to the locating pin and turning it as it was a spring taking care to not damage the groove during the operation. After verifying that the rings do not have strange creeping or binding, position the ring tips around the locating pin.

We are now ready to assemble the piston and cylinder. A light coating of two stroke oil should be applied to the piston with the ring(s) assembled. Position the arrow printed on the piston dome toward the exhaust side, install one circlip on the opposite side you will slide the pin thru and pressing the ring (or the rings) into the groove one by one starting from the top slide the cylinder assembly over the rings. When this is complete carefully lower piston and cylinder onto the connecting rod and slide piston pin thru piston and rod and install circlip. If you prefer you may install piston onto connecting rod first and then compress ring(s) and install cylinder (4).

Assemble cylinder onto cases and install cylinder head and torque all fasteners to the recommended specs in your owner's manual.

4 Stroke

After disassembling the cylinder head and the cylinder, it's necessary to measure the actual cylinder diameter (1), using a dial bore gauge. When actual bore size is known then it is time to pick the right VERTEX piston to fit your bore size, respecting the clearance suggested with the cylinder (i.e. CRF450 clearance 0.05 mm).

Attention must be paid to any markings (i.e. T) on the rings surface: always position the ring with the written part on the top side.

To assemble the rings on the piston you must start from the oil ring and introducing as first the spring (2) paying attention to not place one on the top of the other the two extremities. After setting the two foils one up and the other down at direct contact with the groove, taking care that the open tips must be at 120° from the spring open tips.

We are now ready to assemble the compression ring(s) into the piston groove(s): first of all pay attention to not crush or damage the ring during installation, every precaution should be taken not to compromise the ring integrity with the groove and to not reduce the rings retaining pressure.

Introduce before the 2nd groove and after the 1st groove ring turning it as it was a spring (3) taking care to not damage the groove during the operation. After verifying that the rings do not have strange creeping or binding, position all the rings using the rule of the 120 deg. for each ring tip.

We are now ready to assemble the piston and cylinder. A light coating of two stroke oil should be applied to the piston with the rings assembled. Position the arrow printed on the piston dome toward the exhaust side, install one circlip on the opposite side you will slide the pin thru and pressing the ring (or the rings) into the groove one by one starting from the top slide the cylinder assembly over the rings. When this is complete carefully lower piston and cylinder onto the connecting rod and slide piston pin thru piston and rod and install circlip. If you prefer you may install piston onto connecting rod first and then compress rings and install cylinder (4).

Assemble cylinder onto cases and install cylinder head and torque all fasteners to the recommended specs in your owner's manual.

PRICES

All the prices can be subject to alteration up to the final confirmation of the orders which we received. Unless otherwise agreement, the prices are understood to be in the currency shown in this price-list. The prices of the current price list are VAT excluded.

SHIPMENTS

Goods are always delivered ex-works our factory and they are carried at consignee's risk and on his behalf, even if they are delivered free. The order that we receive from the customers will be carried out with the goods available from stock; no back orders will be kept, if not agreed before.

PACKING

We charge the package to the customer at cost price.

GUARANTEE

All the claims have to be done within five days from the receipt of the goods. Our responsibility is limited to material or working defects of the items we have sold. We are not responsible for damages when the pistons or the other components are altered, evading the original state. We are also not responsible for other possible damages to the other mechanical parts, to the people or to the other things, caused by the braking of the piston.

PAYMENTS

All the payments are to be understood by cash and must be effected by our Company in Cadelbosco Sopra. Other types of payments can be agreed, but in this case all the concerning expenses are to be understood at charge of the customer. We cannot accept payments effected through third parties, representative or agents.

OBJECTION

For every objection is competent the Court of Reggio Emilia.

PREZZI

Tutti i prezzi esposti nel presente listino si intendono IVA esclusa e possono essere soggetti a modifica sino alla definitiva conferma delle ordinazioni ricevute. Salvo diverso accordo, i prezzi si intendono nella valuta del presente listino.

SPEDIZIONI

La merce è sempre venduta franco ns. fabbrica ed in qualunque caso viaggia per conto e rischio del committente, anche se venduta franco destino. Gli ordinativi emessi dalla clientela si ritengono chiusi con la spedizione del materiale disponibile a stock, salvo diverso accordo tra le parti.

IMBALLO

L'imballo viene fatturato al committente al prezzo di costo.

GARANZIA

Qualsiasi reclamo deve essere fatto entro cinque giorni dal ricevimento delle merci. La nostra responsabilità è limitata ai difetti di materiali o di lavorazioni delle parti da noi vendute. Non siamo responsabili di danni a qualsiasi titolo quando il pistone, od organi ad esso collegati, vengono manomessi eludendo le condizioni originali. Non siamo responsabili per eventuali danni ad altre parti meccaniche, a persone o cose causate dalla rottura del pistone.

PAGAMENTI

Tutti i pagamenti si intendono per contanti e devono essere effettuati presso la nostra Sede in Cadelbosco Sopra. Per eventuali pagamenti pattuiti in modo diverso, tutte le spese inerenti si intendono a carico del cliente. Non sono ritenuti validi pagamenti effettuati a mezzo di terzi, Agenti e Rappresentanti.

CONTESTAZIONI

Per qualsiasi controversia è competente il Foro di Reggio Emilia.

2T & 4T POWER

Romain Febvre | 2015 MXGP World Champion

Enea Bastianini | 2015 Moto3 Championship

Eero Remes | 2015 E1 World Champion

Thomas Chareyre | 2015 S1 World Champion

Alvaro Bautista | 2015 MotoGP Championship

Nick Kouwenberg | 2015 EMX250 Champion
